Proficient

## EDUCATION

**B.Tech in Computer Science Engineering**

**IMS Engineering college, Ghaziabad**

📅 06/2019 - 09/2023

**Higher Secondary School**

**St. Mary's sen. sec. school**

📅 2018 - 2019

**Secondary School**

**St. Mary's sen. sec. school**

📅 2016 - 2017

## SKILLS

**HTML**

**CSS**

**Bootstrap**

**Javascript**

**Jquery**

**Github**

**C++**

**DSA**

**MySQL**

## INTERNSHIPS

**NetCamps**

📅 06/2021 - 08/2021

Six weeks summer internship in Web Development and android app development.

**Exposys Data Labs**

📅 06/2022 - 06/2022

Internship programme on software developer.

**Coding Blocks**

📅 06/2022 - 09/2022

Internship programme on Data Structures and algorithms in C++.

**Dabotics India Pvt**

📅 07/2024 - 08/2024

Internship programme on Web Development.

# PROJECTS

---

## Stud Verse - A smart student application

It is an application that enables students to access information regarding their campus activities such as attendance, notes, and other details. The primary function of this application is to record student attendance using a face verification system powered by Machine Learning algorithms.

---

## Dice Game

🔗 <https://rawshivansh.github.io/Dice/>

It is an online dice game that can run on any web browser, created with the assistance of HTML, CSS, and JavaScript. The game generates two random dice rolls for players on the fly and determines the result of the game. The two dices gets rolled every time user refreshes the page and regenerate results accordingly.

---

## Drum Kit

🔗 <https://rawshivansh.github.io/Drum-set/>

It is an online simulator of various musical instruments, created using HTML, CSS, and JavaScript. Users can play the instruments either by clicking on them or by using corresponding keyboard presses.

---

## Simon Game

🔗 <https://rawshivansh.github.io/Simon-game/>

Simon is an electronic game of short-term memory skill invented by Ralph H. Baer and Howard J. Morrison. This is an online version of the game where the player has to remember different tiles rolling pattern and match them with that of computer generated pattern to win the game. This game involves the use of HTML, CSS and Javascript.

---

## Quiz Game

🔗 <https://rawshivansh.github.io/QuizGame/>

It is an online available game to brainstorm your minds. This game contains a set of predefined questions which the player have to answer correctly. The score is generated at the end of the game. This game is made with the help of HTML, CSS and JavaScript.

---

## Nike Product Landing Page

🔗 <https://rawshivansh.github.io/NikePage/>

It is a website showcasing the idea of a product landing page which can be used by various businesses to showcase their products to the customers and make business. This website involves the use of HTML, CSS and Javascript to implement intriguing design language and adding functionality along with it.

---

## TinDog

🔗 <https://rawshivansh.github.io/TinderDog/>

It is a website designed with the concept of Tinder for dogs. The website features fluid and visually appealing design elements, showcasing the magic of CSS. The website presents the features of the app and a premium subscription card for users to enjoy different perks. This website represents the power of Bootstrap.

---

## Move It

🔗 <https://rawshivansh.github.io/Move-It/>

It is website designed to focus brands providing movers and packers services. It depicts the design ideas that can be used as inspiration for new businesses to launch their own website and draw business.

---

## ATM System

It is a mini-project based on C++ that simulates the functionality of an ATM machine. The project enables users to perform various operations such as withdrawing money, depositing money, checking bank balance, and transferring money to different accounts.
